

01

REDUCE WASTE

A quick fix here is to stop using one off printed materials, such as event itineraries and switch to a reusable digital signage.

02

ENERGY EFFICIENT

Technology is changing, this is bringing lots of opportunity to save on the amount of power required to run the av for a show.

06

LIVE LINK

Whilst it's important to get all your staff together for events, doing regional or country events rather than global, will save on a huge number of flights and emissions.

SUSTAINABLE EVENTS

03

VENUE FINDING

Virtual walk throughs can save you hundreds of miles when you try to find the right venue. This all helps to bring the events carbon footprint down

05

LOCAL SUPPLIERS

Working with global companies means that we will be required to travel. We will always try to use local suppliers wherever we are to reduce the flights.

04

IN THE OFFICE

Do you really need to print that document? There will be times when printing is necessary but just think each time could I do without printing this.
